Vitali's Performances

From the first minutes of his performance, Vitali captivates the entire concert public thanks to songs that have an absolutely hit sound.

Spectators experience euphoria (emotional pleasure) from Vitali's voice. This is expressed in various forms: goosebumps, pleasant trembling, tears in one's eyes, and someone cannot even fall asleep at night from an overabundance of emotions. This phenomenon is called "Frisson", it occurs due to the timbre and certain frequencies in the voice of Vitali.

* Frisson - musical chills, which is a response to the promotion of auditory stimuli, which causes a pleasant state that turns into emotional pleasure, euphoria, bliss, goosebumps, etc.
